

**Víctor Manuel Hernández Madrigal**  
Vice-President for Latin America Candidate

**Performance Plan**

This performance plan is based on the IAEG Statues and Bylaws and intends to give continuity to the current Vice-President project. Is important to remember that the main purpose of a regional Vice President is “to foster the aims and purposes of the Association in their region”, so, the tasks of my project will focus on:

- To promote IAEG membership and to encourage new National Groups.
- To respond the communications and request from IAEG President, General Secretary, Nationals Groups, and members of the region.
- To strength the collaboration between the National Groups of South America through the interchange of courses, webinars, meets, etc.
- To promote the IAEG-South America in national and international events.
- To stimulate the YEG activity.
- To identify and engage with engineering geologists of the countries where IAEG is not yet present, and work to establish new National Groups.
- To organize an IAEG South American Regional Conference in occasion of the 2023 congress of the IAEG National Group of Mexico.
- To encourage the publication of South America research achievements in the IAEG Bulletin.
- To stimulate the participation of members of the regional groups of South America in the IAEG.

Yours respectfully  
Morelia (Mich), Mexico, Jun 07, 2022.
