

DR. VICTOR MANUEL HERNANDEZ MADRIGAL

Mail: victor.hernandez@umich.mx

My name is Víctor Manuel Hernández Madrigal. I am professor and researcher at the Institute for Research in Earth Sciences of the Universidad Michoacana de San Nicolás de Hidalgo. I am Civil Engineer with a Master in Metallurgy and Materials Science and Ph.D. in Geography. I am been working with hydrogeological risks, specially landslides and subsidence monitoring. I have level one recognition from the National System of Researchers of Mexico. I am Co-founder of the Institute for Research in Earth Sciences and its director (2018-2022), founding President of the Mexican Association of Hydrogeological Risks (2021-2023) and of the Mexico National Group of the International Association for Engineering Geology and the Environment (IAEG). I was recently elected as vice president of the IAEG Latin America region for the period 2023-2026, and I will make every effort to strengthen the collaboration of the current national groups and the integration of new ones.
